Slimline Stainless Steel Channel Drainage by Allproof

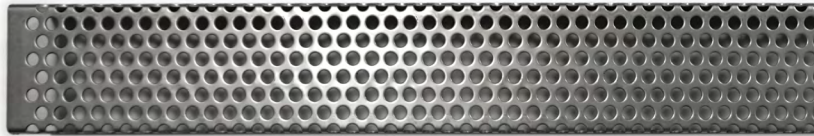

The perfect solution for those wanting a stylish linear look when draining wet areas. The Slimline system offers the flexibility to choose the desired channel lengths, widths and angles you need to achieve the finish you are looking for.

The Allproof Slimline system provides unique and elegant options for applications such as bathrooms, balconies, courtyards, pool areas, car parks, kitchens and driveways. It utilizes high quality materials including 316 or 304 stainless steel grating and PVC channel options.

The Slimline linear drainage channel means that cross cutting tiles into a central floor waste is no longer required. The system enables the use of a single plane of fall in a tile floor, providing a subtle and visually appealing finish where large tiles can be successfully integrated. This significantly reduces the set up time required to create the floor levels and install the tiles.

A Grate - 316 Wedge Wire. 38mm, 65mm & 100mm

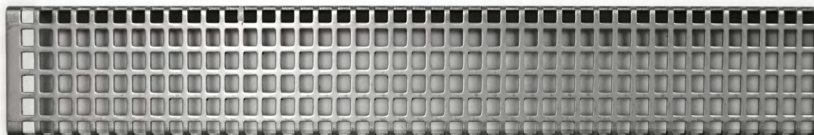

D Grate - 304 Perforated. 38mm & 65mm

LAS Grate - 304 Laser Perforated. 38mm, 65mm & 100mm

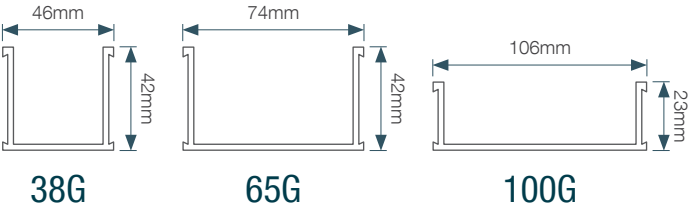

SL Grate - 304 Slotted Perforation. 38mm & 65mm

SQ Grate - 304 Square Hole Perforation. 38mm & 65mm

PVC Channel Options:
