CIRCULAR SPACERS

Sometimes known as Pile Cage Spacers or wagon wheels. These are designed for use when you're lowering cages into pile holes or trenches, they easily clip to the cage & keep the cage perfectly spaced as it is lowered in to the ground. They boast a unique feature of extra wide inbuilt sleeves around the bar, this means the spacer will not twist out of the desired position – this is crucial when ensuring your steel is located perfectly in place.

PLASTIC SHIMS - 150mm

Designed for levelling and packing objects with a high load mass. Ideally suited to pre-cast concrete panels in the industrial, commercial and civil construction industries. Each shim is colour coded for easy selection, contains ribs for non-slippage, is made with premium quality materials and are proven and tested out in the field. All panel shims are certified and meet current Australian standards. Test results are available upon request.

HORSE SHOE WINDOW PACKERS

Designed primarily for the window and glazing industry, these small horse shoe styled packers are used extensively throughout the building and construction industries.

They assist with the levelling and packing of commercial shop fronts, cabinets, windows, doors, jambs and many other applications.

Made from high quality material, these products are colour coded for easy selection, and come in a range of different thicknesses.

All window packers are tried and proven in the field and have been fully tested for load bearing and compression (results available upon request).
