

2500 Series

Plasson fittings are an internationally recognised 16 Bar rated compression fitting specifically designed for use with Iplex BlueLine and Blackline pipe. These external fittings offer exceptional joint security for metric OD polyethylene pipe and form a seal without distorting the pipe or restricting the pipe bore. Plasson fittings can also be used on Iplex Greenline and Redline™ as well as Novathene™ low density polyethylene pipe in sizes 20mm and 25mm. A large range of threaded fittings make Plasson a very versatile product range and allow compatibility with other pipe materials. Plasson fittings are available in 75mm and 90mm diameters for use with Iplex effluent pipe.

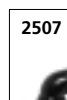

2501 90° ELBOW

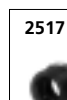

Ordering Code	Size
